Rescue Penny's Father from the Evil Calico!

* Scooter not in game.

*Saving the world
in style!*

Don't worry you're with me.

Hurry! The fate of Penny's father is in your hands!

Rescue Penny's father from the clutches of Calico and save the world. Hack computers and battle the forces of evil, travelling all the way from Italy to a hidden island in Oceania, taking in Russia, China and Belize on the way. Adventure in action-packed missions, just like Bolt's TV series in the feature film!

But be careful - you'll need all of Bolt's super powers, and all of Penny's wits, to keep Penny from falling into the hands of Calico and his dastardly shadow organisation.

Mode of Play

Single-Player - Play as either Bolt or Penny in 25 action packed missions. Which character you play depends on the mission.

Start the Adventure

Once the game starts, the Main Menu will give you the following choice:

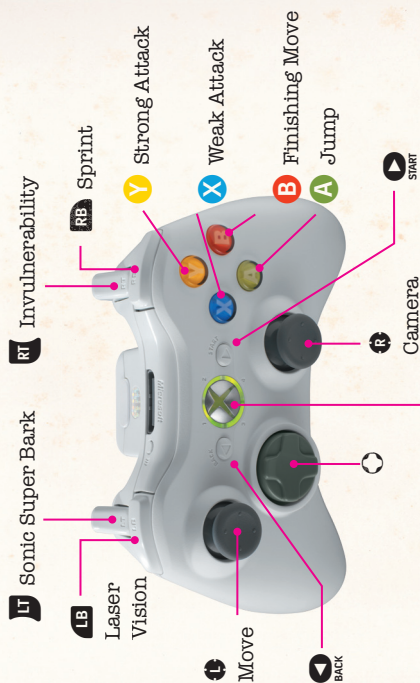

- Play Game - Load a previously saved game.
- Minigames - Play the BOLT mini-games.
- Options - Access volume controls and more.
- Extras - Access previously viewed cut scenes, Bolt movie trailer, and more.

Family Settings

These easy and flexible tools enable parents and caregivers to decide which games young game players can access based on the content rating. For more information, go to www.xbox.com/familysettings.

Bolt's Controls

Use Bolt's super abilities to protect Penny and rescue her father.

H.U.D.

The heads-up display (H.U.D.) will show your progress and keep track of your health and energy.

Pick-Ups

Collect health and energy fills as you make your way through each mission. Nine fills will replenish your health and energy completely.

- **Health and energy capsules** - refills only a portion of your health.
- **Health and energy bar upgrades** - increases total health capacity.

Note: Penny does not have a health bar.
A single hit or capture will defeat her.

Environments

Use all of Bolt's skills and Penny's wits to complete the game's missions and rescue Penny's father.

Italy

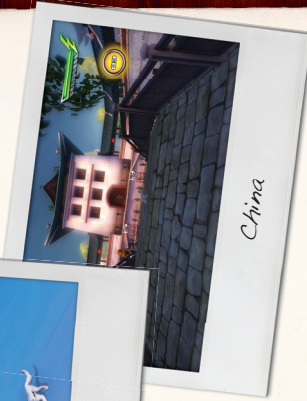

Belize

Russia

Oceania

China

- Italy: Crash a meeting of Calico's men.
- Belize: Avoid capture in the Mayan Temple.
- Russia: Keep Calico from carrying out his dastardly plans.
- China: Sink Calico's nuke-carrying ship and hack his computer system.
- Oceania: Reach Penny's father on this hidden island before it's too late.

Villains

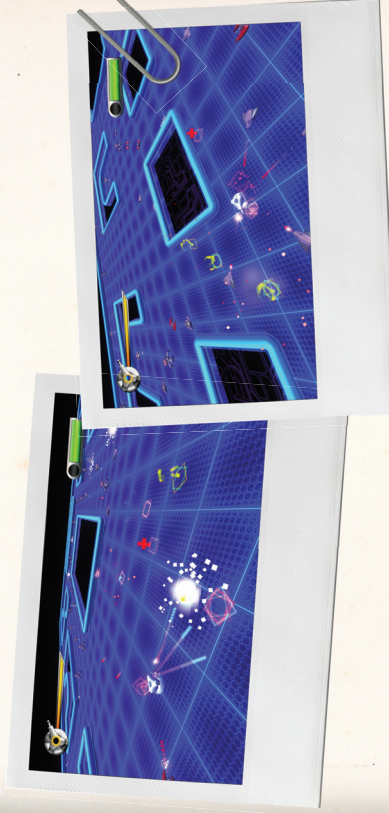

Beware! There are lots of nasty villains who will try to stop you from completing your missions.

- Glovey - Watch out for his swipe.
- Proddy - She likes to thrust her spear at you.
- Bully - Careful of his whip - he's great with it.
- Starry - His ninja throwing stars can cause serious damage.
- Disky - Avoid his sticking bombs at all costs.
- Stompy - Don't get stomped by his explosive boots.
- Hoverbot - Beware of these mini helicopters.
- Laser Turret - Watch out for these lasers.
- Grenade Launcher - Its grenades may bounce, but they also explode with force.
- Bouncing Betty Mine - Keep your eyes peeled for these bouncing mines.

Minigame

In some levels, you'll have to hack into different computer systems to continue on your mission.

These are virtual world minigames which you have to complete in order to progress. These minigames have their own HUD, pick-ups and weapon upgrades.

The pick-ups include health and energy, as well as weapon upgrades. Weapon upgrades include a bullet spreader, which splits the single fire into a triple fire shot, and a rapid fire upgrade which doubles the current fire rate. These upgrades can also be mixed to enhance the effect. For example, if you pick up a triple fire shot and then pick up a rapid fire shot, you are now upgraded with a rapid fire triple shot. There is also a "bomb" attack which is used by pressing the Right Trigger. This attack destroys all enemies within a certain radius, but it also slows you down for a few seconds and consumes all of your energy.

Games vary in the amount of floors required to complete the hack. Once all floors are cleared, the hack ends and you can resume control of Penny.
